TEAM YOU TRUST

Creative Safety Consultants

About us

Creative Safety Consultants (CSC) are experienced and dedicated Quality, Health, Safety & Environmental (QHSE) professionals who use their knowledge, skills and experience to:

- Promote a positive quality, health, safety & environmental culture across an organisation.
- Develop solutions to quality, health, safety & environmental challenges.
- Ensure workplace risks are well controlled.
- Ensure the organisation is compliant with all relevant legislation & standards.

Our experts optimize outcomes across a wide range of industries including Oil & Gas, Chemicals, Petrochemicals, Buildings & Construction, FMCG industries, Mining & Metals, Utilities, Transportation, Banking, Educational Organisations and Hospitals.

Our Commitment

We are committed to helping our clients to protect their employees and assets, improve the effectiveness of their operations, innovate more rapidly and improve the capabilities of their workforce to meet the demand of evolving workplace challenges.

Our Approach

Our unique approach combines a personalised, high-quality service with complete cost certainty. Our focus is not just on the processes and technical barriers that protect companies and their assets, We emphasize capabilities and skills building through education, training and coaching from field personnel to senior business leaders to build a living and robust organizational culture that achieves a fundamental, sustainable transformation for our clients.

Our Goals

Our goal is to enable clients to use their internal resources and talent to outperform benchmarks, raise productivity, lower incident rates, exceed regulations and optimize capital returns.

By addressing the technical, behavioral and cultural aspects of your operations, we help you develop a framework that maximizes your existing assets, mitigates risk and drives continuous innovation.

Our Advantages

As part of our tailored service, each of our clients benefit from access to a named QHSE Consultant, who will get to know your organisation, the particular challenges you face and your specific objectives so that they can implement a safety management system that works for you.
